ABOUT US

We are one of the leading manufacturer and supplier, incorporated in India in 1984, with advanced machines in its line to meet the market demand for Molded Rubber Products, Rubberising of Metal Spacers and Engineering Parts. We have been in the custom-molded rubber industry for over 39 years and can manufacture any custom-molded rubber parts to suit the customers' needs. In addition to manufacturing molded rubber products, we can also manufacture and supply engineering parts.

We have a well-equipped tool room with highly trained die makers supported by experienced technicians to meet customers' needs. We locally supply and export a wide range of Rubber Products and Engineering Parts from Mumbai, India, across the globe. We are committed to the durability of the quality and reliability of the Rubber products , provided to build a successful and long-term business relationship with our clients. We are dedicated to constantly seeking ways to provide higher levels of customer satisfaction. We are constantly improving quality standards, in line with trends, which is beneficial for our clients.

Our success depends on our clients' loyalty and satisfaction.

INFRASTRUCTURE

- We have a production area of 9,000 sq. ft.
- Our processing capacity stands at 100 metric tons per month.
- We have in-house laboratory and compound blending capacities to ensure the quality and timely availability of the raw material of the first process itself.
- Our covered storage area is 3,000 square feet for hassle-free storage of our ready-to-pick finished orders.
- We have our own stand-alone tool room to ensure that orders are on schedule.

OUR TOOLROOM

Our in-house design team has expertise in advanced industrial software such as NX CAD and Powermill CAM make it possible for us to design your desired products.
